

TECHNOLOGY-ASSISTED TRAINING WITH THE ARMEO® SPRING

The Armeo® Spring provides technology-assisted arm training. It enables patients, children and adults, to use any remaining motor function and encourages them to achieve a higher number of reach and grasp movements based on specific therapy goals. The Armeo® Spring therapy improves activities of daily living and arm function and strength.

Advantages of Armeo® Spring Therapy

- **Simultaneous Arm & Hand 3D Therapy**
The Armeo® Spring allows simultaneous arm and hand training in an extensive 3D workspace with six degrees of freedom.
- **Increased Therapy Efficiency**
The Armeo® Spring weight support maximizes the patient's motor functions. It also enables therapists to deliver higher training efficiency thanks to self-directed therapy, which may lead to better long-term outcomes.
- **Motivating Exercises & Performance Feedback**
An extensive library of motivating game-like exercises and augmented performance feedback have been designed to train core movement patterns that are commonly used in daily life.
